WORK EXPERIENCE

01/2022 –
03/2023

Full Stack Javascript Engineer
[Invozone](#)

I am working across multiple projects with an agile team as a full-stack javascript developer. I joined Invozone in the capacity of Frontend Engineer and now become a Full Stack Developer.

My main responsibilities are:

- Building, Designing, and Maintaining frontend of client projects
- Writing non-blocking, optimize backend code
- Design architecture of both frontend and backend side.
- Resolving bugs and adding features to an existing project
- Writing clean code with industry best practices
- Communication with offshore US team and product owner about new features/improvements
- Focusing on UI that is cross-browser compatible & supported by major browsers (Safari, Chrome, Firefox, and IE) across devices.
- Extensively using GIT for version controlling and regularly pushed the code to Git/Gitlab
- Interacting with the testing team, scrum master, and business analysts for fixing the Issues

Projects

1: Invohub (3/22 - 3/23 [URL](#)) is developed for managing resource data. Such as managing resources salaries, their increment record, performance in different projects, attendance, remaining annual, casual, sick leaves. It also keeps a record of managing resources who are free and who are engaged in particular projects. Moreover Invohub can be used by any organization who has multiple projects onboard. So they can easily manage their project information like, project manager, team lead, resources working on that particular project, performance of each resource.

2 Gigimot (3/22 - 5/22 [URL](#)) Gigimot is online video meeting app, which gives users flexibility to arrange one to one or group recurring virtual meetings. This product is used by health and wellness coaches, teachers. Gigimot offers multiple tools, so a product user (service provider) can manage their

customers online, Gigimot is an all-in-one solution that simplifies their job. Unlike traditional CRM, Gigimot is a web and mobile SaaS application that allows coaches to grow their business internationally, manage session bookings, and receive payments, and Livestream all from one place.
