Summary

5+ years experience in Front-End Development and Full Stack Development with a strong background in delivering cutting-edge features. Proficient in Vue, React, Angular, Node, and AWS technologies. Skilled in designing and building frontend core features, optimizing code for non-blocking performance, and modernizing legacy codebases into modern frameworks.

Skills: Vue.js · React.js · Node.js · TypeScript · AWS · Git · Agile · SQL · Docker · HTML · CSS · Redux · Software Development · MySQL · SASS · HTML5 · Web Development

Achievements :

- Reduce 60% of the loading time of apps by converting legacy code into a modern framework.
- Attract 100% more agents from the past by giving one of my project (Real Estate app) a new UI look and adding new features.
- Help one of my client organization to become the #2 real estate app in New York by continuous efforts in the tech area.
- 10 million New York residents using my newly developed feature comparative market analysis (CMA), which helps them to find rental and sale buildings by comparing pricing for similar buildings in neighborhoods.
- Automate 90% of one of my organization's day-to-day office tasks by developing an in-house SaaS system.
- Cut one of my previous organization's 100% monthly expenses allocated for Slack. We developed an in-house chat application for inter-communications between teams and employees.

Experience

Senior Software Engineer

Highline Residential

Mar 2023 - Present (9 months)

Responsibilities:

- Cross-Browser Compatibility: Ensure that web applications work consistently across different browsers
- Testing and Debugging: Conduct thorough testing of the frontend components to identify bugs.
- Create and develop user-friendly UI interfaces, ensuring a visually appealing and responsive design.

Impact

- Reduce 40% the loading time of the app by using a modern framework with optimized Webpack configurations.
- Remove 15% of junk and repeatedly use code by creating reusable components.
- Attract 100% more agents from the past by giving the app a new UI look and adding new features.
- Help organization to become #2 real estate app in New York by continuous efforts in the tech area.

- 10 million New York residents are able to use my newly developed feature comparative market analysis (CMA), which helps them to find rental and sale buildings by comparing pricing for similar buildings in neighborhoods.

Full Stack Engineer

InvoZone

Jan 2022 - Mar 2023 (1 year 3 months)

Responsibilities:

- Design architecture of both frontend and backend of client projects.
- Communication with the offshore US team and product owner about new features/improvements.
- Interacting with the testing team, scrum master, and business analysts to fix the Issues.

Impact:

- Automate 90% of the organization's day-to-day tasks by developing an in-house SaaS system.
- Help 500+ organization employees by developing a portal, which helps them to apply for leave, check their attendance, and review their performance.
- Cut the organization's 25% monthly expenses by automating their routine office tasks by developing a system.

Frontend Developer

Programmers Force

Sep 2020 - Dec 2021 (1 year 4 months)

Responsibilities:

- Write and style the front-end components that meet the requirements
- Vue & Vuex architecture
- UX flows, design, and implementation
- Monitor and process all production deployments
- Configuring Webpack for optimized performance of the app

Impact

- Cut the organization's 100% monthly expenses allocated for Slack. We developed an in-house chat application for inter-communications between teams and employees.

Education

University Of Central Punjab

Bachelor's Degree, Computer Science

2016 - 2020

I have a bachelor's degree in computer science. Major subjects of degree are OOP, Data Structure And Algorithms, Web Development, Compiler Construction, Operation System, Computer Networking, Data Science, Machine Learning, and Theory of Automata.

Licenses & Certifications

AWS Certified Solutions Architect Associate SAA-C03 - Udemy

Issued Sep 2023 - Expires Sep 2027

Skills

Vue.js • React.js • Angular • Webpack • Node.js • Amazon Web Services (AWS) • Docker Swarm
• TypeScript • .NET Framework • HTML5
